EDUCATION

Uttaranchal University, Dehradun

2023 – 2027

Bachelor of Technology (B.Tech) — Computer Science Engineering

TECHNICAL SKILLS

Languages: Java, Python, C++, TypeScript

Backend: Spring Boot, Spring Security, JWT Authentication, OAuth2 (Google), REST APIs, JPA/Hibernate, Maven

Databases: MySQL, PostgreSQL, MongoDB, Redis

Messaging/Streaming: Apache Kafka

Cloud & DevOps: Docker, Git, GitHub, AWS (EC2, IAM, S3)

Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

AI/ML Exposure: PyTorch, Hugging Face Transformers, NLP, Scikit-learn

OPEN SOURCE EXPERIENCE

Apache Fineract Contributor (Open-source fintech platform)

- Debugged audit pagination issues in Apache Fineract caused by LIMIT/OFFSET handling
- Implemented and validated query-generation fixes in a Dockerized development environment through API testing
- Followed Apache contribution workflow including Git, Pull Requests, and maintainer reviews

EXPERIENCE

Software Development Intern — CodSoft

Jan 2026 – Feb 2026

- Developed Java-based backend features and integrated REST APIs with React frontend components
- Debugged application issues and collaborated through Git-based development workflows

AI Development Intern — Bharat Intern

April 2026 – May 2026

- Fine-tuned GPT-2 on custom conversational datasets using PyTorch and Hugging Face Transformers
- Built preprocessing, tokenization, and DataLoader pipelines to structure training data for the fine-tuning run
- Evaluated generated responses using automated metrics and qualitative analysis

PROJECTS

Campus Notification System

Spring Boot, MySQL, Redis, Kafka, Docker, Google OAuth2

github.com/Yashgoswami-ds/campus-notification-system

- Built a Spring Boot notification platform supporting asynchronous event processing through Kafka, Redis caching, and scheduled delivery workflows
- Added Google OAuth2 login alongside JWT-secured APIs, with Redis caching and Kafka-based event delivery for real-time notifications
- Designed a reusable logging middleware library for structured request, response, and exception tracing across services

VisualNest — Photography Portfolio Platform (Client Project) React, TypeScript, Vite, Spring Boot, MongoDB, JWT, Supabase

github.com/Yashgoswami-ds/visualnest

- Delivered a full-stack platform for a paying client: a public portfolio site plus a secure, OTP-verified admin dashboard, deployed to production
- Built JWT authentication and forgot/reset-password flows with stateless, CORS-secured APIs backed by MongoDB Atlas
- Integrated Supabase Storage to fix ephemeral-disk media loss; documented APIs with Swagger and deployed on Render + Vercel

AI Knowledge Assistant

Flask, Vector Embeddings, REST APIs

github.com/Yashgoswami-ds/AI-Knowledge-Assistant

- Built a semantic-search assistant using embedding-based retrieval, ingesting local notes, uploaded PDFs, and URL content into one searchable store
- Exposed search, history, and document endpoints as a JSON API, with a translation layer for multilingual answers

ACHIEVEMENTS

- Led hackathon teams across multiple national and college-level events; secured Runner-up for an AI/ML-based solution
- Leading a SIH 2025 team building a Real-Time Public Transport Tracking System proposed for the Government of Punjab
- Solved 300+ Data Structures and Algorithms problems across LeetCode and GeeksforGeeks

CERTIFICATIONS

HP LIFE — Artificial Intelligence | CodSoft — Backend Development | Oasis Infobyte — Java Programming
